Dear Commissioner Jonathan Adelstein:

I ask your support for the continued availability of the "UNE-Platform."

My company, Access One, offers local telephone service in select SBC territories. The company has achieved increasing success largely because it utilizes the combination of "unbundled network elements" – the UNE-Platform - to serve customers. It is absolutely critical that we have continued access to the UNE-Platform to remain competitive.

Unfortunately, the Regional Bell Operating Companies have launched a full-scale attack on the UNE-Platform, realizing it is a major threat to their continued market dominance. Their strategy is to impose certain restrictions on individual network elements that would destroy the competitive value of the UNE-Platform. If the RBOCs succeed, it will all but end any chance for consumers to enjoy the benefits of meaningful competition in local phone service

Please oppose any effort at the Federal Communications Commission or at state agencies to limit the availability of the UNE-Platform. The UNE-Platform should be firmly and permanently established as a viable service option for competitive telecom carriers.

Thank you very much for your time and attention to this important matter.

Sincerely,

Mark A. Jozwiak
Executive Vice President
Access One Incorporated

Dear Commissioner Copps

I write to urge you and your fellow FCC Commissioners to allow the 1996 Telecommunications Act to work to its fruition

Specifically, I believe that State Public Service Commissions should be the lead agency in determining how best to ensure competition in the local telephone service market. These agencies are best equipped to make decisions in the best interest of the consumers of their respective states.

Regulatory actions that allow the Regional Bell Companies to provide long distance service without providing access to their local networks to potential competitors at reasonable rates are simply feeding the insatiable appetite that accompanies all monopolies. Monopolies are bad for America's economy, stifle innovation and gouge the consumer.

I strongly urge you to allow state regulators to set the so-called UNE rates and take any such regulatory actions that will ensure those rates are set at a level to allow for true competition in local telephone service.

Sincerely,

Kevin Igoe

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service

Millions of Americans like me could have their phone service threatened if the local phone companies arent required to allow competitors access to the market. Im also concerned about the Commissions move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Nelma McGee

Dear Commissioner Adelstein.

Please see the attached letter concerning your review of UNEpp

Thank you,

Norman D. Mason, CEO
Cat Communications International, Inc
dba CCI

Mr. Jonathon S. Adelstein, Commissioner
Federal Communications Commission
Washington, DC
February 5, 2003

Dear Commissioner Adelstein:

I am the CEO of a CLEC (Cat Communications International, Inc. dba CCI) which provides residential local exchange services (as well as long distance) to credit challenged low income consumers. CCI is one of the largest providers of residential local service to this segment of the economy throughout thirty (30) states.

In our on-going effort to provide ever better and cheaper local service to our customer base, UNE-p has come to be an essential element by which we can and do pass on additional saving to our customers. Without UNE-p we would be forced to increase charges or reduce the grade of service we can offer our local customers. Resale discounts typically do not reflect a true "avoided cost". Resale, on the contrary, is the most expensive way by which companies such as ours can make local phone service affordable to low income families. The history of residential service prior to the advent of UNE-p stands as clear evidence there will be no local residential competition at all without the assist provided by the availability of UNE-p. Only when access line densities or revenues reach certain levels of concentration can local residential service competition survive without UNE-p.

I urge you and the entire Commission to move with the greatest of care when addressing the importance of UNE-p for companies such as ours which has made affordable local residential phone service a reality for over 100,000 low income families.

I thank you for your kind attention on this very critical matter.

Sincerely,

Norman D. Mason, CEO
Cat Communications International, Inc (dba CCI)

February 5, 2003

Dear Commissioner Adelstein:

I ask your support for the continued availability of the UNE-Platform.

I work for eLEC Communications Corp, which offers local telephone service in New York, Pennsylvania and New Jersey. The company has achieved increasing success largely because it utilizes the combination of unbundled network elements - the UNE-Platform - to serve customers. It is absolutely critical that competitive local carriers have continued access to the UNE-Platform to remain competitive, and benefit consumers. Before the state PUCs negotiated UNE-P rate changes in these states within the last 12 months, we could not compete as a competitive local exchange carrier.

Unfortunately, the Regional Bell Operating Companies have launched a full-scale attack on the UNE-Platform, realizing it is a major threat to their continued market dominance. Their strategy is to impose certain restrictions on individual network elements that would destroy the competitive value of the UNE-Platform. If the RBOCs succeed, it will all but end any chance for consumers to enjoy the benefits of meaningful competition in local phone service. We offer consumers a 25% savings on usage, in comparison to the RBOC rate. We save money for people. We are a small business, creating jobs in a local community. I do not see how companies like Verizon, which just announced earnings of over \$2 billion for the last quarter, need any additional pricing support from the FCC.

Please oppose any effort that will limit the availability of the UNE-Platform. The UNE-Platform should be firmly and permanently established as a viable service option for competitive telecom carriers.

Thank you very much for your time and attention to this important matter.

Sincerely,

Paul H. Riss
